

PHYS 331 — Problem Set #6

Reading: Taylor Section 12.9

Reading Journal for Monday 9/23: Does the reading mesh with the graphical approach to the Logistic Map that I introduced on Friday? If not, which things don't mesh well? Other reactions to the section are also welcome.

Problems to be handed in Monday September 23:

1. Taylor 12.23. (The calculation for part (c) isn't quite as easy as the analogous calculation for the logistic map.)
2. Taylor 12.24
3. Taylor 12.25
